

Customized solutions for individual requirements.

■ **Test and flow-stop disc plugs / Powerline DN 200 - 4000**

One-part or multi-part design, different outlets on request, for leak test, flow-stop and flow diverting.

**Powerline** design for leak tests and blocking up to 15 bar available.

■ **Pipe plugs and test plugs DN 12 – 75**

As a conical and cylindrical shape as well as block and test plugs available. Individually configurable according to your needs.

■ **Mechanical pipe plugs DN 12 - 600**

With and without outlet, all connections, pressures, sizes, shapes and resistances possible = design according to your needs.

**High pressure up to 100 bar!**

■ **High pressure test plug DN 12 - 1600**

Max. 100 bar back pressure. Design as desired.

**Product Overview:  
Test and Flow-Stop  
Equipment**

The testing devices with the plus in technology and ideas.

Test reliability for daily use.

■ **MB joint tester DN 100 - 600**

Multi-Size joint tester with more stroke/tolerance suitable for all pipe materials, especially PP or other plastic pipes with different inside diameters

■ **Mupp I, Mupp II joint tester DN 100 - 600**

Joint tester for use with a trolley and a 360° pan head camera, with and without self-monitoring

With self-monitoring!

■ **MPG Maxi joint tester DN 600 - 4000**

Designed for leak testing according to DIN EN 1610. Constructed according to your needs. Multi-Part and manhole channel design. Special designs for almost all profile shapes. For pipes with or without a dry weather flow.

■ **MPG Powerline joint tester DN 600 - 2400**

Improvement of the MPG Maxi series for high-pressure tests up to 15 bar. Multi-Part and manhole channel design. Special designs for almost all pipe shapes.

■ **Komupp joint tester DN 600 - 3000**

Award-winning collapsible joint tester for pipe dimensions from DN 600, Manhole channel design, quick to (dis)assemble, can be folded almost completely.

■ **House connection testing kit DN 90 - 150, DN 150 - 200, DN 200 - 300**

Consisting of a test plug, an MDA flow-stop plug, 10 meters of special push hose with internal steel spiral, a unique sealing system to pass through the push hose, various adapters and a pump.

■ **MDA sewer test and flow-stop plugs DN 50 - 500**

Conical shape, very flexible, bendable and can be inserted through the smallest of openings. Available in several designs and rubber qualities.

■ **Jumbo Multi-Profile sewer test and flow-stop plugs from DN 400 - 2400**

Suitable to almost all shapes of pipes: circular, egg, square, kite profiles. Operating pressure: 1.0 bar, back pressure: 0.5 bar

■ **Multi-Size sewer testing and flow-stop plugs DN 20 - 1800**

Available in various rubber qualities and designs for a variety of uses.
